

Vehicle Upgrade Database

If you're a DIY mechanic like me, then you've probably run into the situation of having upgraded so many components on your vehicle that you've forgotten what it was, when you did it, how many miles you've put on it, and where you got it from. This is a website made for all the "do it yourselfers" out there who want a place to track your investments, and watch it progress.

1999 Jeep Cherokee XJ

Mileage	Purchase Price	Cost to Date	Service Status	Last Updated	Update
117000	\$750	\$5000	<div></div>		Update

My '99 Jeep Cherokee, codename Falcon. Originally purchased as a nearly bone stock replacement for my last rusted out Cherokee, I bought this in November of 2019 as a platform to build for my dream of long distance overland travel. So far, I have been able to restore and preserve this beautiful XJ with interior ceramic and sound insulation, bedliner, and sprayed a medium pearl gray bedliner on the exterior. I have modified the suspension to 4" of lift, and added a long arm front control arm kit to get the max ground clearance possible. I plan to add a 4.6 stroker Inline 6 engine soon to add some extra power for all the weight is inevitable with all the gear required for a long range expedition.
